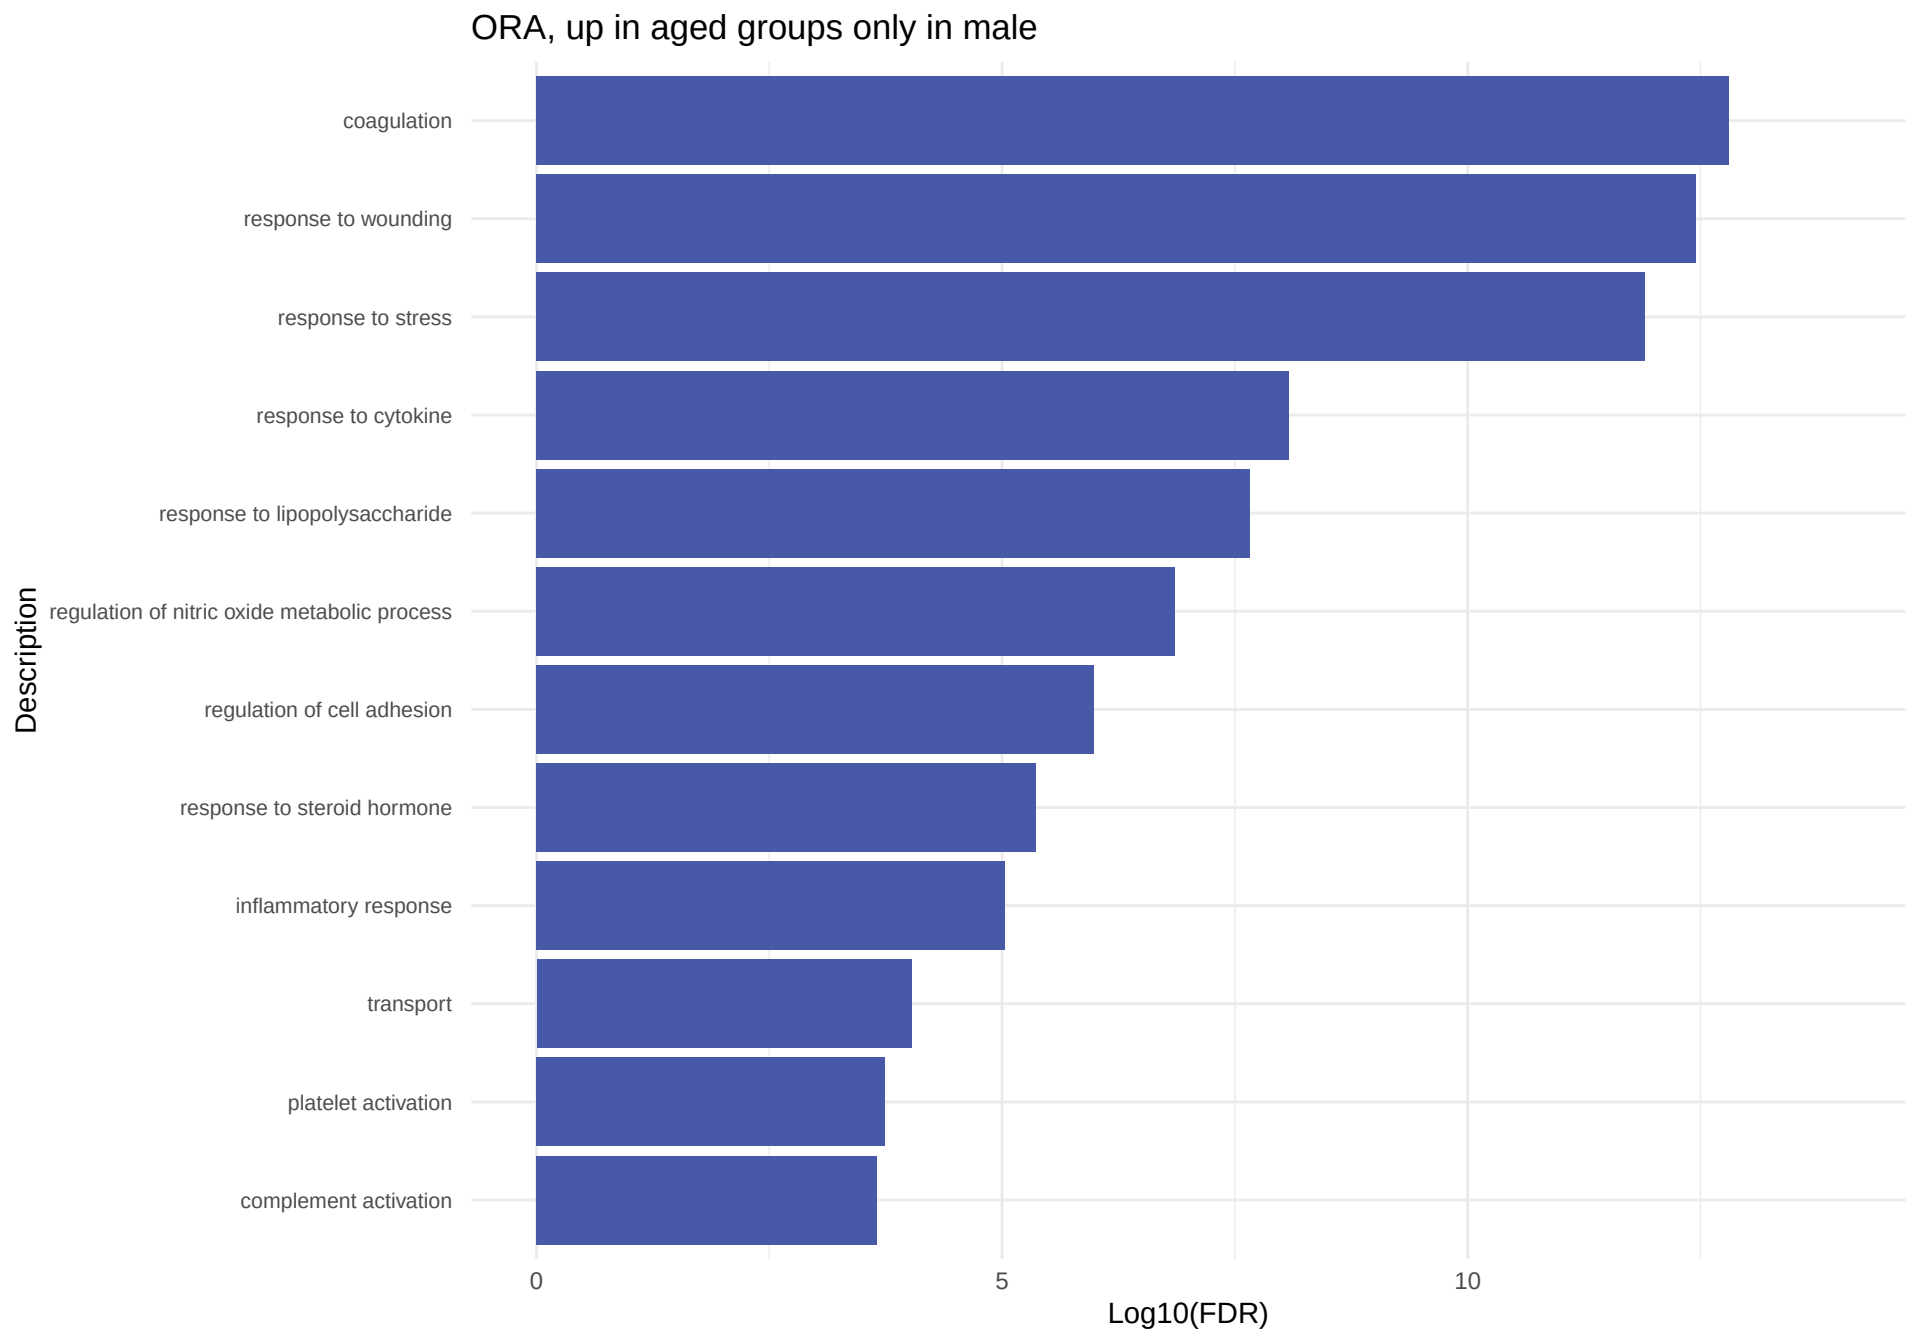
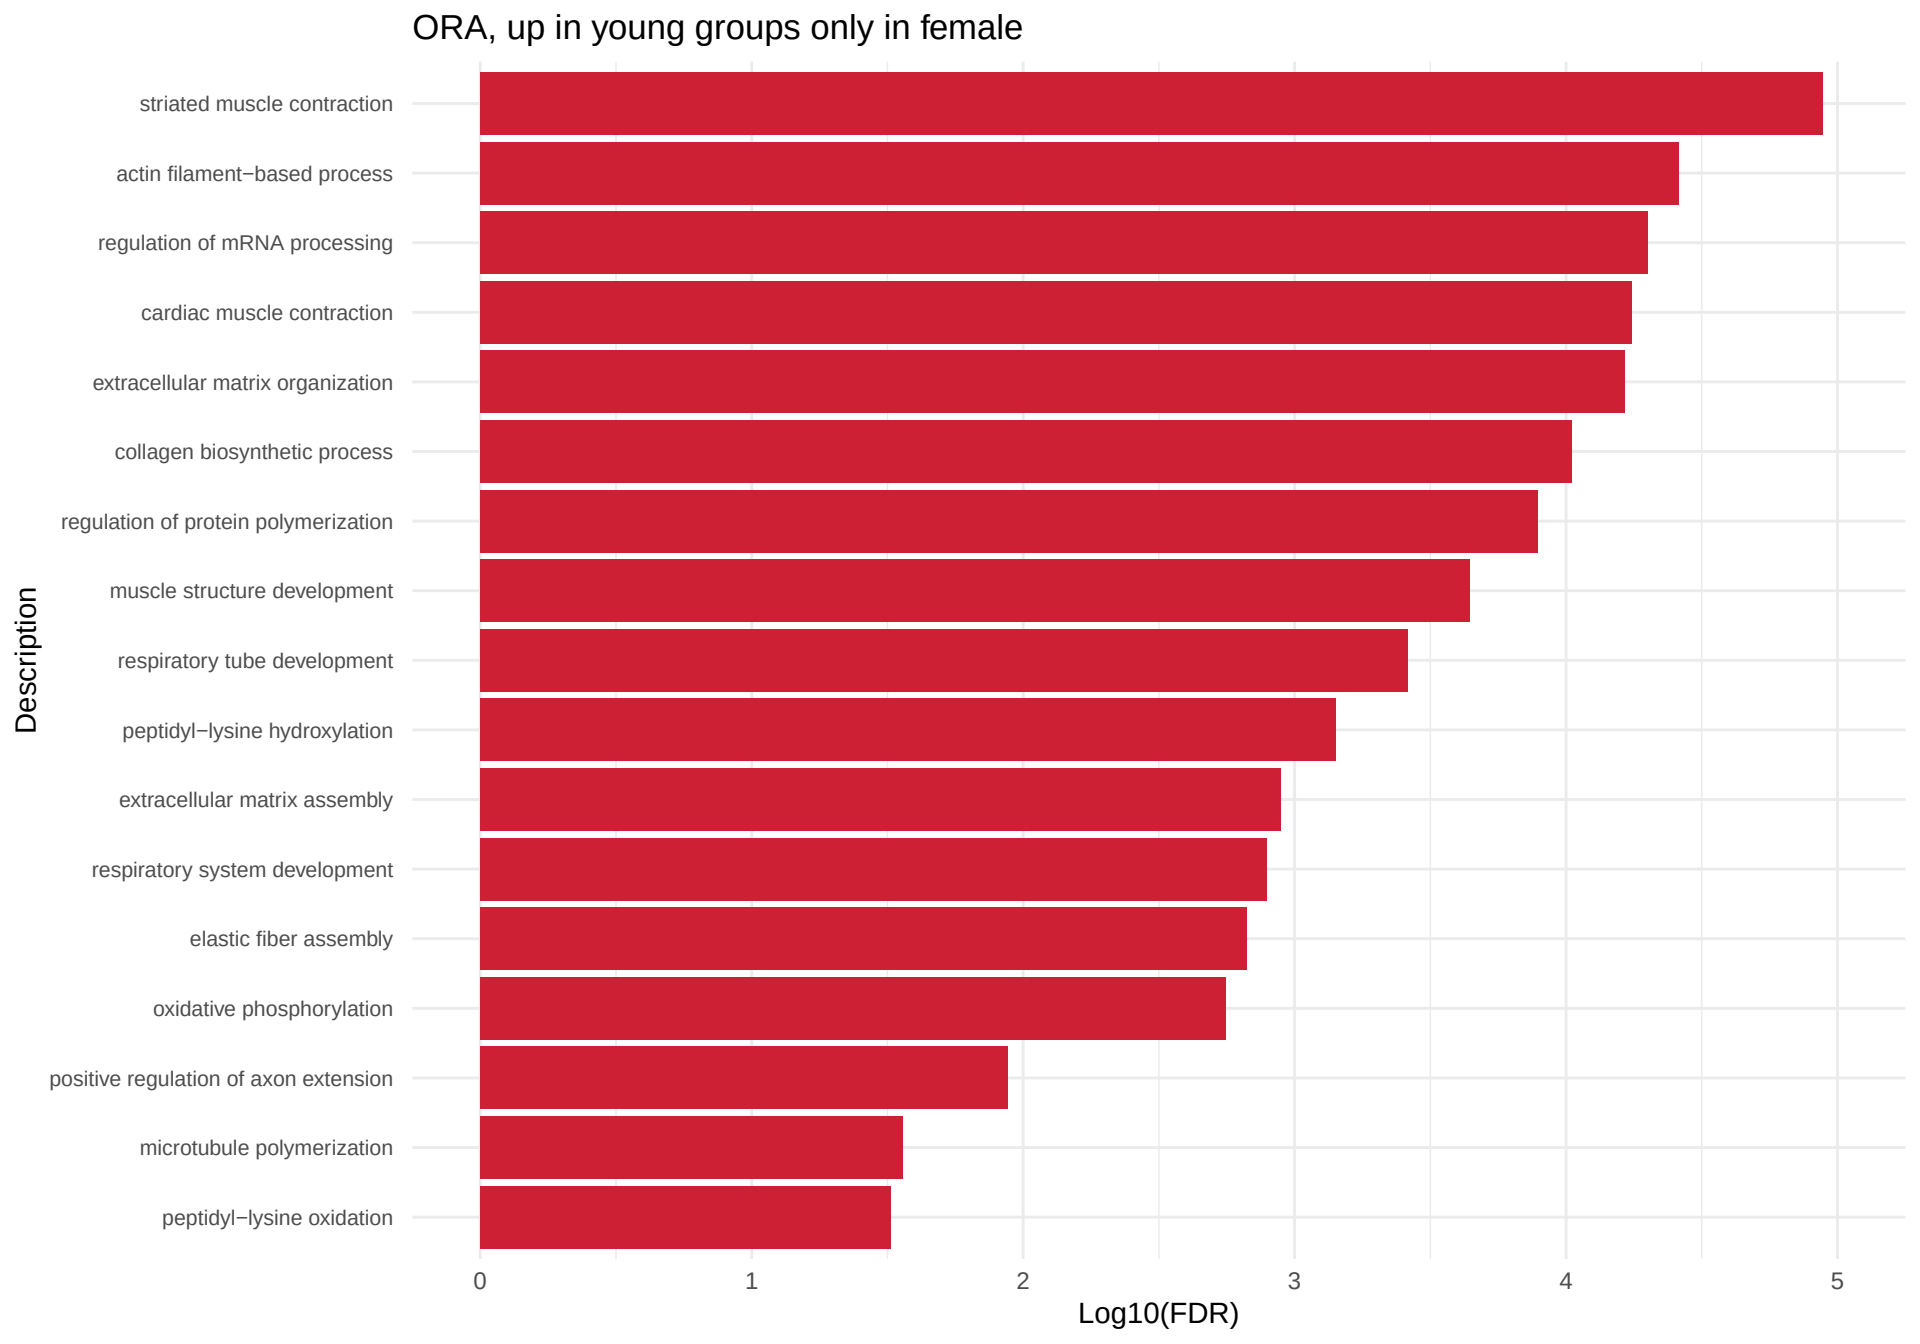
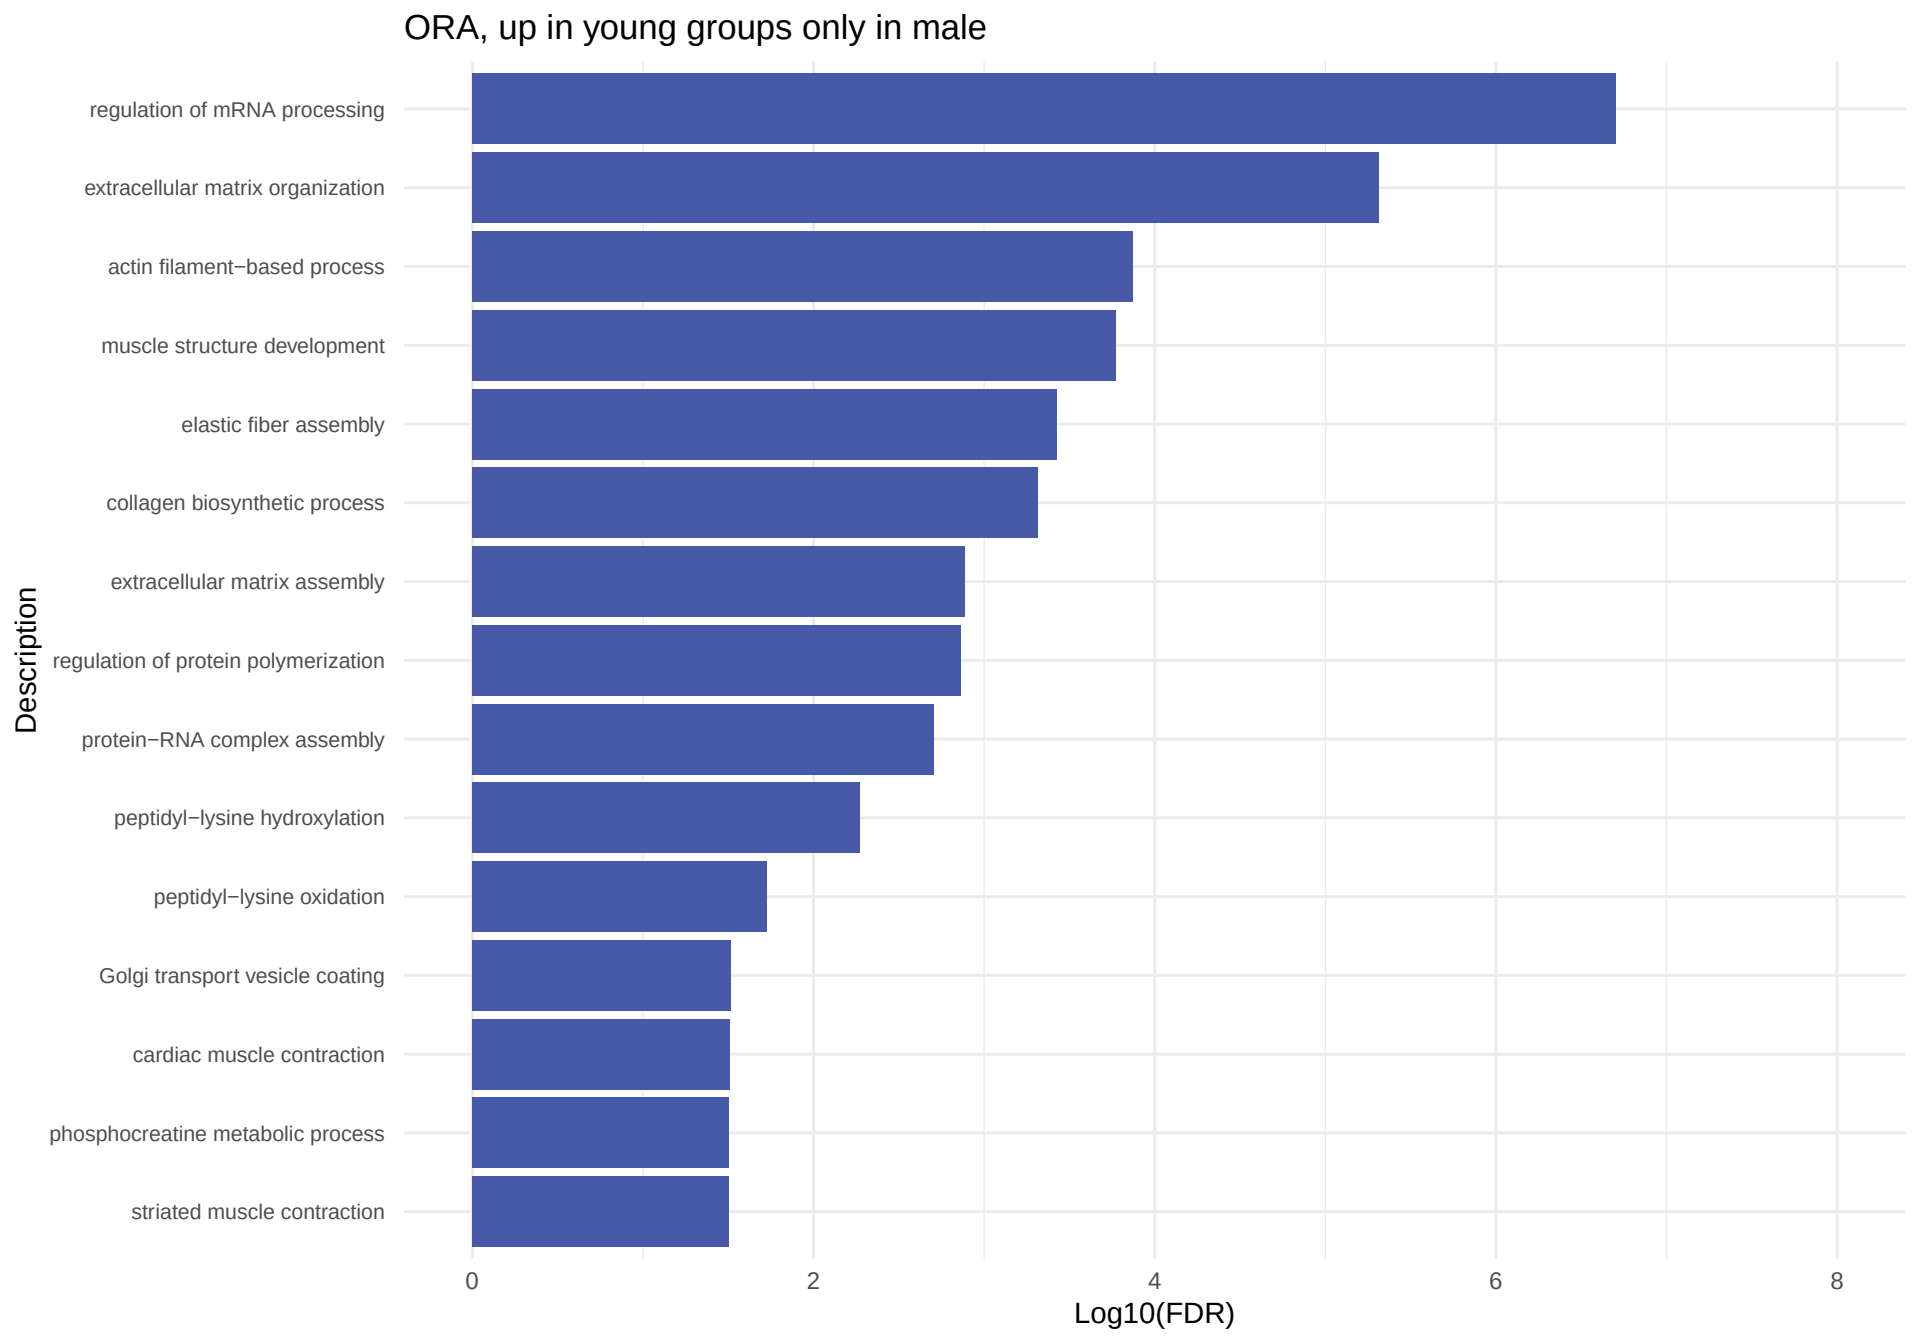
ORA, up in aged groups only in female
transport
response to wounding
response to stress
coagulation
cellular component organization
carbon dioxide transport
cell projection assembly
multicellular organismal−level iron ion homeostasis
cilium organization
cellular detoxification
complement activation
inflammatory response
Description
0
2
4
6
8
Log10(FDR)



ORA, up in aged groups only in male
coagulation
response to wounding
response to stress
response to cytokine
response to lipopolysaccharide
regulation of nitric oxide metabolic process
regulation of cell adhesion
response to steroid hormone
inflammatory response
transport
platelet activation
complement activation
Description
0
5
10
Log10(FDR)



ORA, up in young groups only in female
striated muscle contraction
actin filament−based process
regulation of mRNA processing
cardiac muscle contraction
extracellular matrix organization
collagen biosynthetic process
regulation of protein polymerization
muscle structure development
respiratory tube development
peptidyl−lysine hydroxylation
extracellular matrix assembly
respiratory system development
elastic fiber assembly
oxidative phosphorylation
positive regulation of axon extension
microtubule polymerization
peptidyl−lysine oxidation
Description
0
1
2
3
4
5
Log10(FDR)



ORA, up in young groups only in male
regulation of mRNA processing
extracellular matrix organization
actin filament−based process
muscle structure development
elastic fiber assembly
collagen biosynthetic process
extracellular matrix assembly
regulation of protein polymerization
protein−RNA complex assembly
peptidyl−lysine hydroxylation
peptidyl−lysine oxidation
Golgi transport vesicle coating
cardiac muscle contraction
phosphocreatine metabolic process
striated muscle contraction
Description
