ORA, up in young groups only in bottom
collagen metabolic process
extracellular structure organization
extracellular matrix organization
collagen biosynthetic process
elastic fiber assembly
response to hypoxia
tissue remodeling
protein hydroxylation
peptidyl−lysine hydroxylation
response to phenylpropanoid
actin filament organization
positive regulation of oxidative stress−induced neuron intrinsic apoptotic signaling pathway
Description

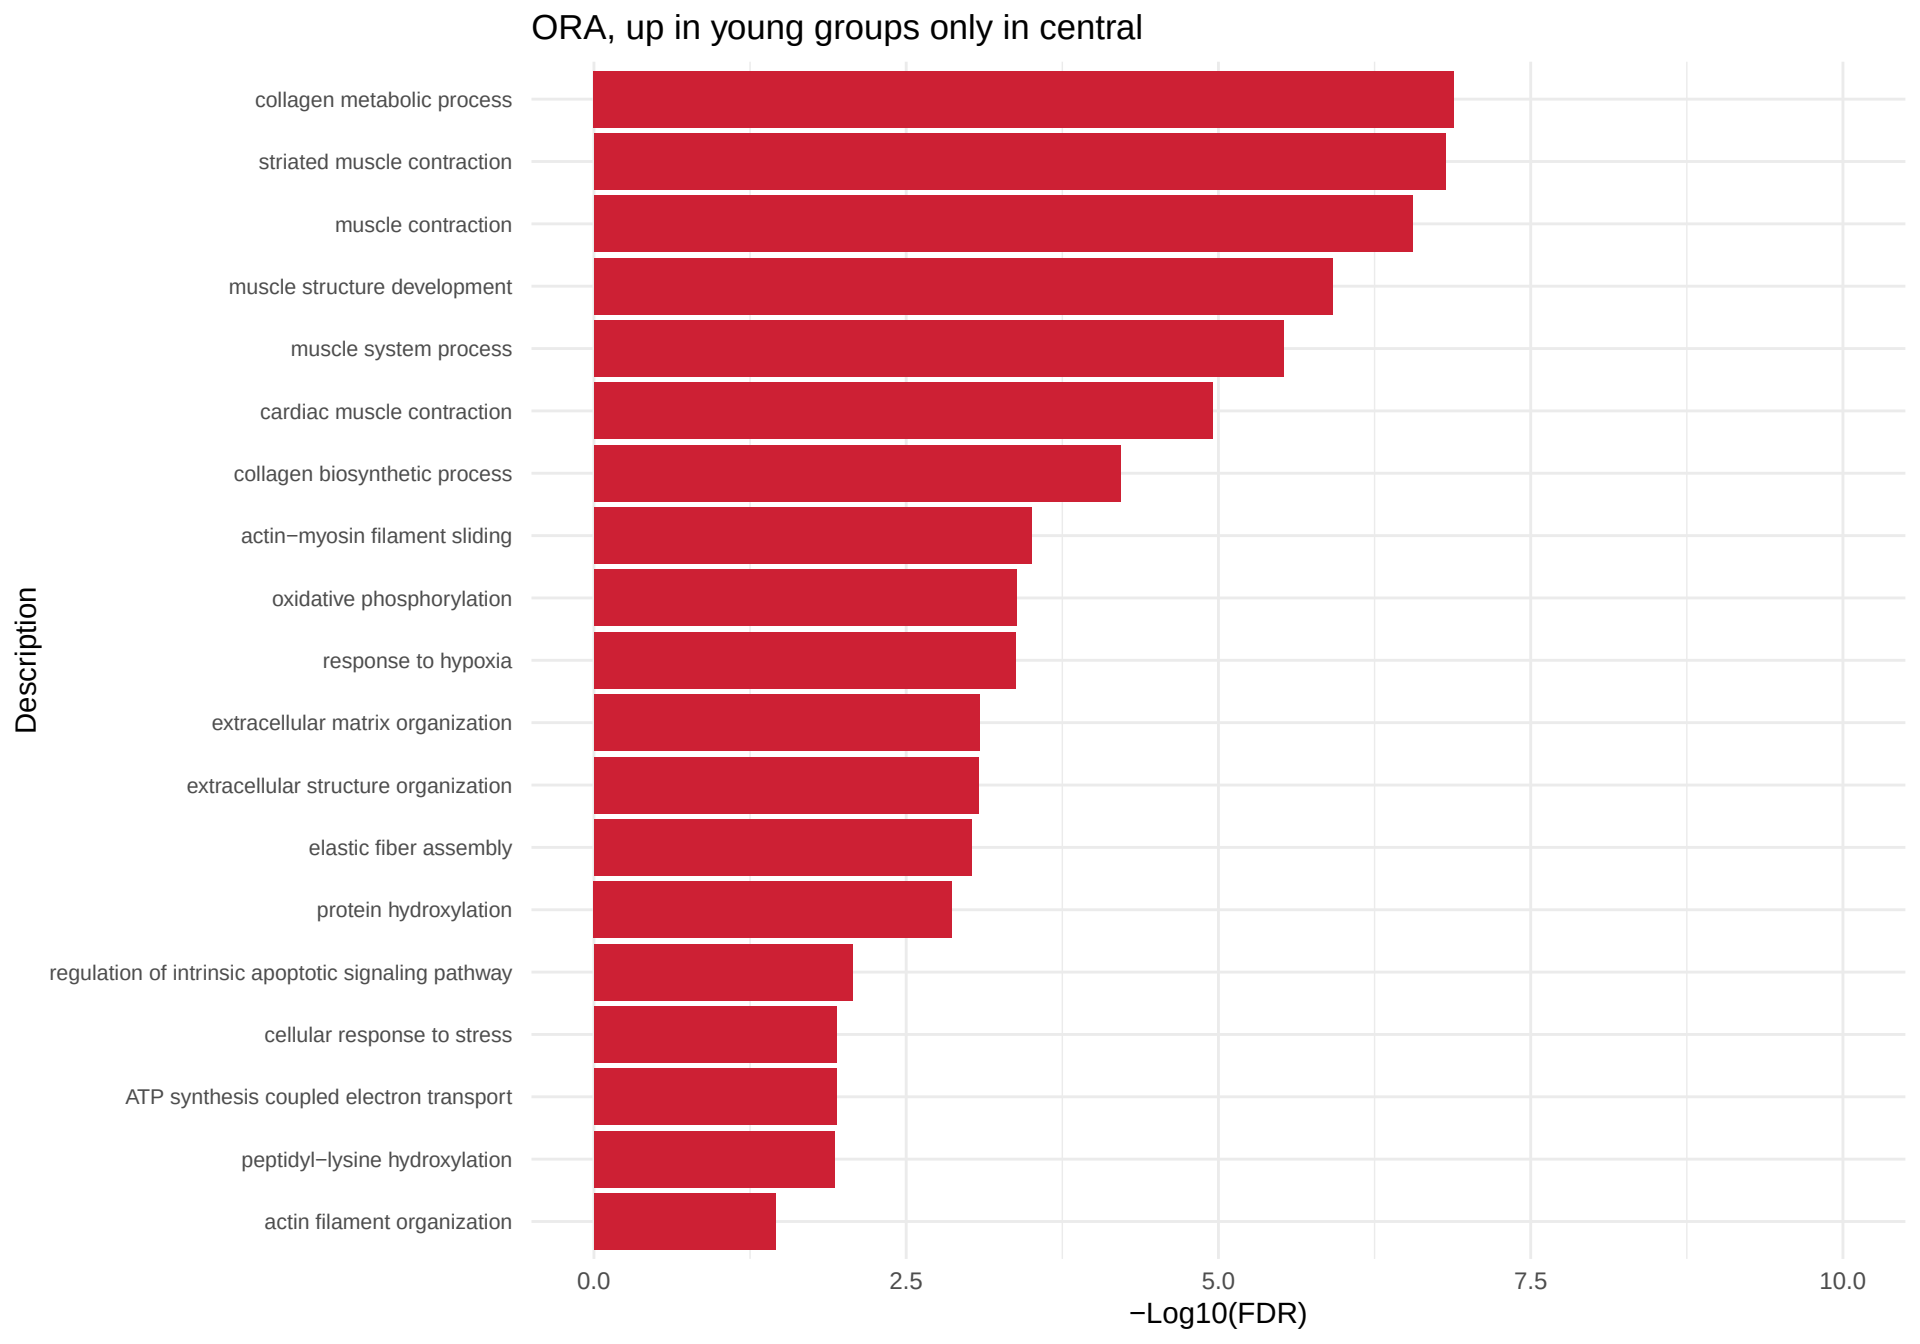
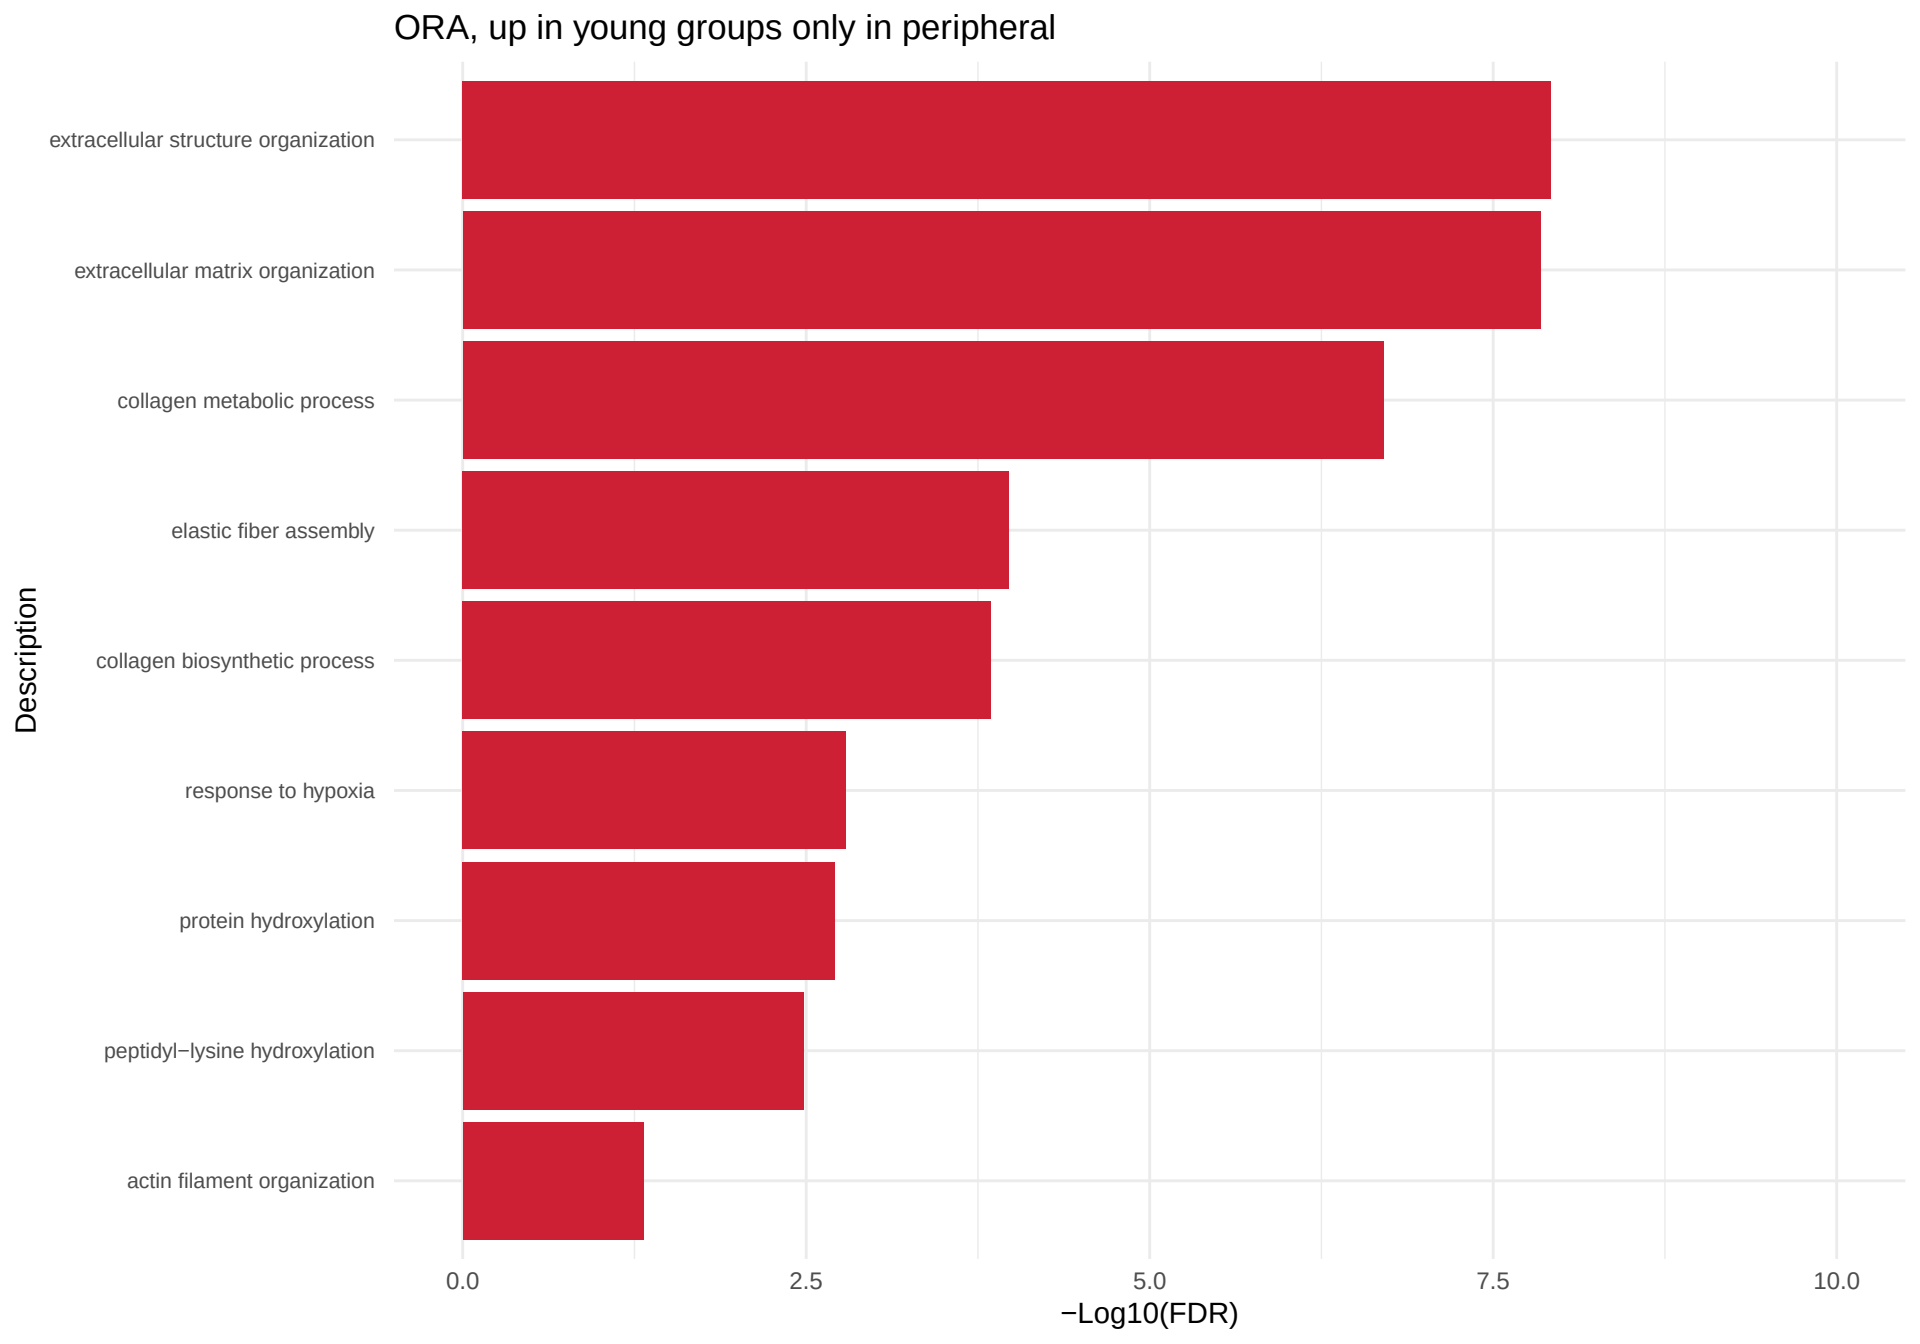
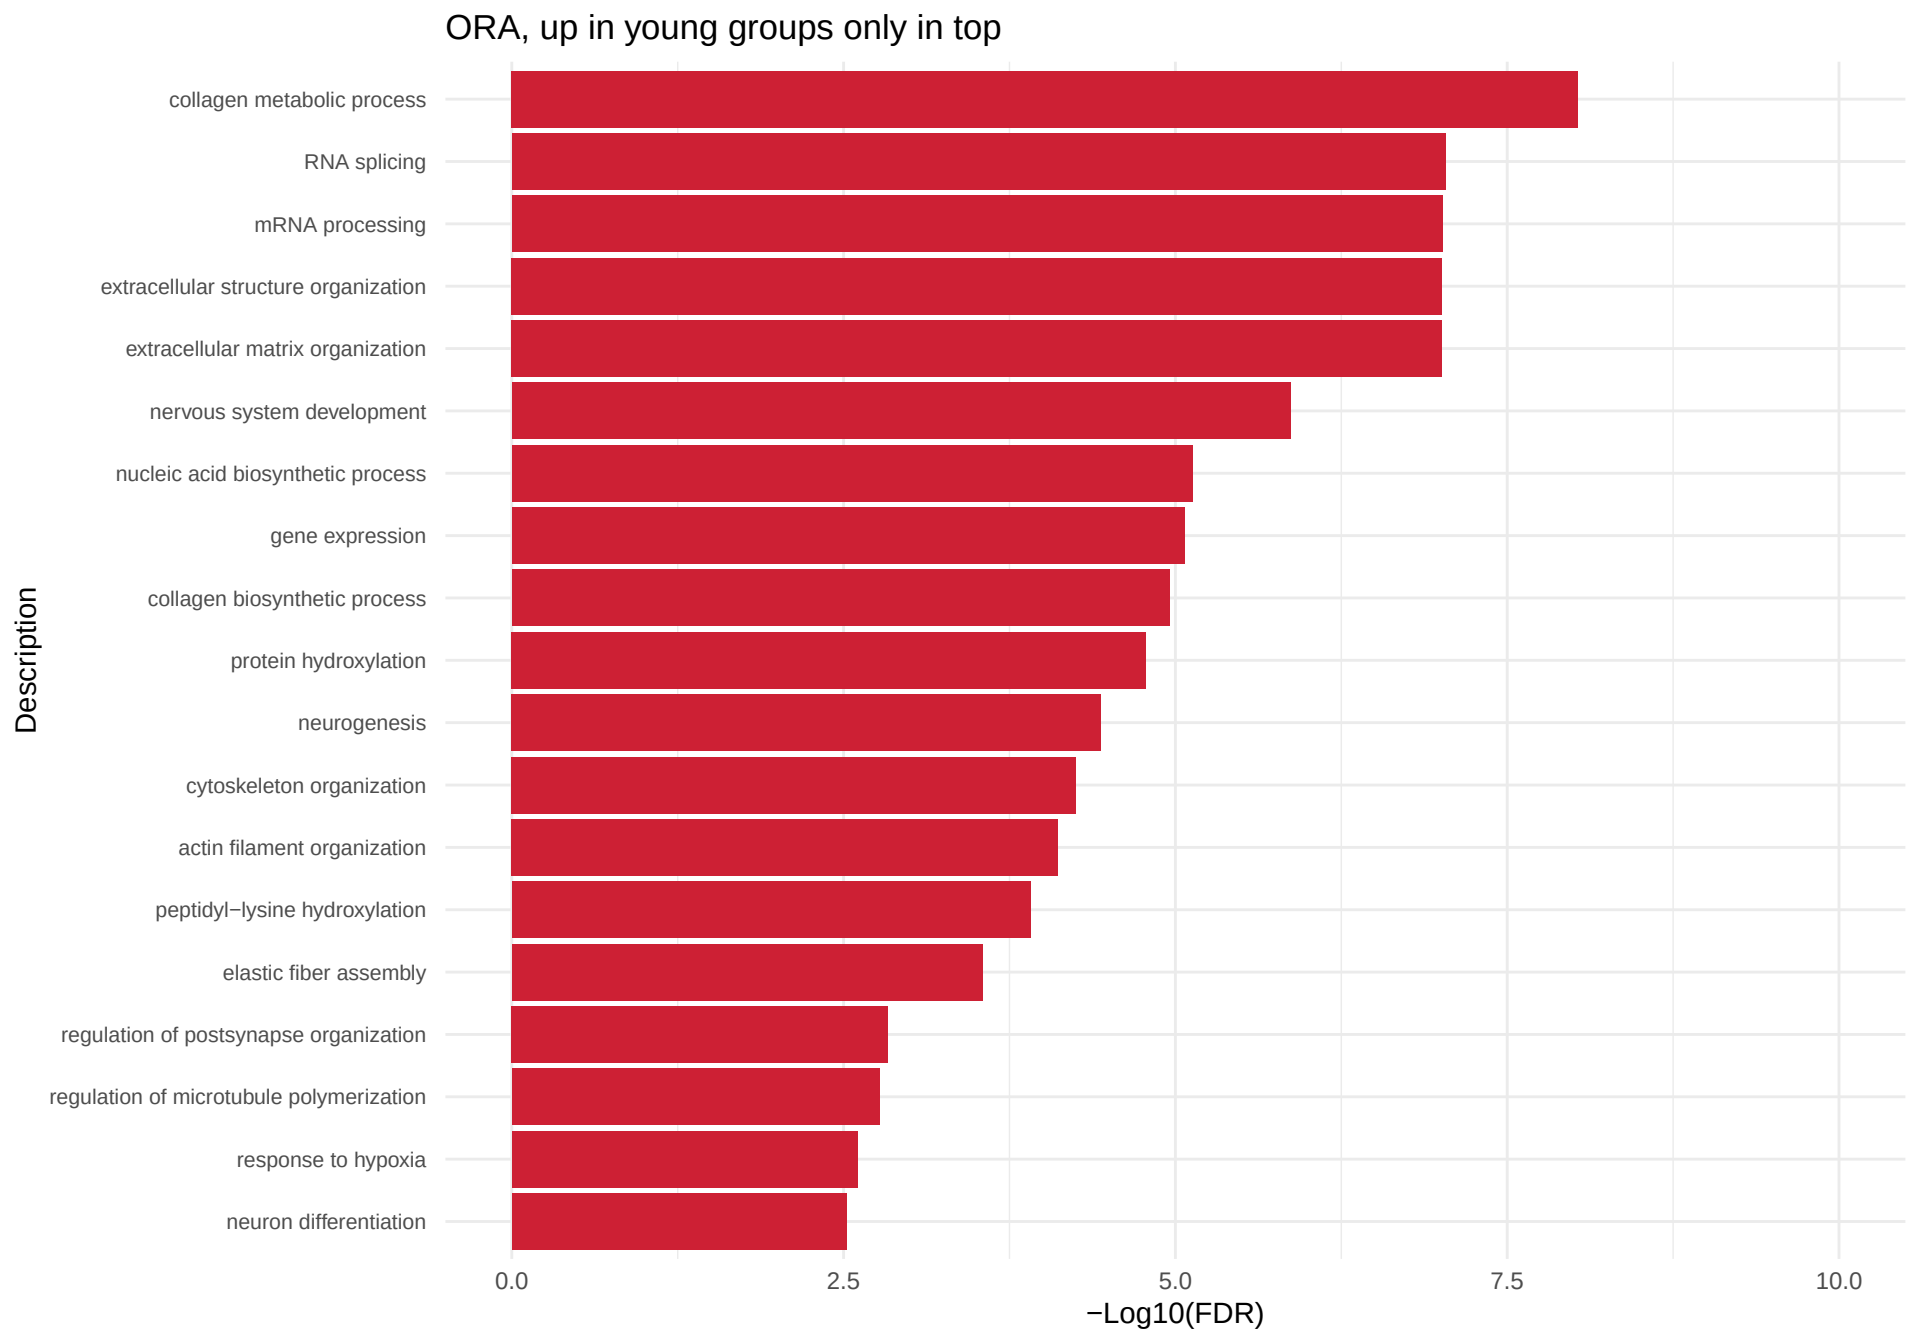
−Log10(FDR)



ORA, up in young groups only in central
collagen metabolic process
striated muscle contraction
muscle contraction
muscle structure development
muscle system process
cardiac muscle contraction
collagen biosynthetic process
actin−myosin filament sliding
oxidative phosphorylation
response to hypoxia
extracellular matrix organization
extracellular structure organization
elastic fiber assembly
protein hydroxylation
regulation of intrinsic apoptotic signaling pathway
cellular response to stress
ATP synthesis coupled electron transport
peptidyl−lysine hydroxylation
actin filament organization
Description
0.0
2.5
5.0
7.5
10.0
−Log10(FDR)



ORA, up in young groups only in peripheral
extracellular structure organization
extracellular matrix organization
collagen metabolic process
elastic fiber assembly
collagen biosynthetic process
response to hypoxia
protein hydroxylation
peptidyl−lysine hydroxylation
actin filament organization
Description
0.0
2.5
5.0
7.5
10.0
−Log10(FDR)



ORA, up in young groups only in top
collagen metabolic process
RNA splicing
mRNA processing
extracellular structure organization
extracellular matrix organization
nervous system development
nucleic acid biosynthetic process
gene expression
collagen biosynthetic process
protein hydroxylation
neurogenesis
cytoskeleton organization
actin filament organization
peptidyl−lysine hydroxylation
elastic fiber assembly
regulation of postsynapse organization
regulation of microtubule polymerization
response to hypoxia
neuron differentiation
Description
