GSEA GO, Central vs Peripheral, enriched in the central group
muscle tissue development
muscle organ development
cellular component assembly involved in morphogenesis
muscle system process
muscle cell differentiation
actomyosin structure organization
non−membrane−bounded organelle assembly
multicellular organismal movement
cardiac chamber development
neuromuscular process
regulation of system process
circulatory system process
actin filament−based movement
muscle cell cellular homeostasis
sarcoplasm
contractile fiber
mitochondrial protein−containing complex
respirasome
actin cytoskeleton
actin binding
